Roll to Roll Eco-solvent Inkjet Printer

JV100-160

Expert printing made easy.

JV100-160 Expert printing made easy.

The JV100-160 is a new inkjet printer designed based on Mimaki's "high image quality" and "reliability" technology, an expert in inkjet printers for sign graphics, with an emphasis on ease of use and high operability. All the superior technologies mounted to the JV100-160, such as a new function of DAS that automatically makes adjustments when changing media, the new RasterLink7 RIP software that makes work faster and significantly reduces processing time, and the newly developed AS5 ink with high drying performance will back up your business.

The four UP-graded features for power-up your business

UP!

Function for the high image quality UP!

DAS

Auto-adjustment of dot position and media feed amount correction by printer

Speed UP!

Faster print of high-quality images

27.4 m²/h

Ease of use

Mimaki original RIP

DAS (Dot Adjustment System)

Reduces the load of media adjustment for each media exchange and leads to beautiful prints

The function to adjust automatically the dot position and the feed amount that affect print quality as the standard equipment.

After changing a media and a printing condition, the ink dot position and media feeding amount must be adjusted accordingly. Since DAS automatically applies them, printing can be performed without labor and variation of adjustment by the operator (*1).

*1 : Some media cannot be automatically applied.

Improper dot position

Overlap/Black streaks
(Insufficient feeding amount)

Gap/White streaks
(Excessive feeding amount)

Proper dot position and feeding amount

DAS

It is the function to print a dedicated pattern to the media and read by the sensor mounted on the carriage to adjust automatically:

- Dot position (Dot jetting position at the bi-direction)
- Feeding amount (Media feeding amount)

MAPS4

NCU/NRS

Long-standing reliable technology to achieve high image quality by Mimaki of Sign graphics expert

“MAPS4” supported (Mimaki Advanced Pass System) Banding reduction function

By printing the border of the path in a gradation tone, banding (horizontal stripes), uneven color, and glossy stripes are reduced to achieve smooth printing.

Based on printing conditions such as media/ink type and resolution, the most suitable gradation pattern is automatically selected and printed.

Minimum ink size 4pl Beautiful print of less granularity feeling

Three different ink dot sizes are used in printing to enable high-quality print with reduced granular feeling.

Dots are combined with the minimum size of 4pl to enable smooth color printing with less granular feeling.

NCU/NRS employed to monitor missing nozzles

The sensor automatically detects the condition of nozzles. When the NCU (Nozzle Check Unit) detects a missing nozzle, it automatically performs cleaning. If there is a nozzle problem left unsolved by the cleaning, NRS (Nozzle Recovery System) automatically replaces the defective nozzles with other nozzles, and enables users to continue their operation without waiting for service personnel.

Print Speed

Possible to increase print jobs of short delivery times with reliable high-speed printing

Ink

Beautiful × Speedy × Eco-friendly
Eco-solvent ink of well balanced in every respect

Mimaki's newly developed Eco-sol ink AS5

The AS5 is Mimaki's newly developed ink with high quality and safety which features high drying properties.

Since the ink evaporates quickly after printing, it prevents blocking during winding and reproduces the details perfectly without impairing the detailed depiction in images with a large amount of ink.

Mimaki's reliable & long-seller, SS21 ink can be installed.

Either 4C or 8C of AS5 or SS21 ink can be installed and the 8C ink set consists of CMYKcLm plus Light black and Orange, which enables extremely beautiful and vivid color expression and sharp, high-definition printing. By using Light black, it is possible to faithfully reproduce monochrome data without color transfer on a gray scale, human skin without graininess, and gradation expression without tone jump.

Color comparison

"Eco-Cartridge", an eco-friendly reusable ink cartridge is prepared for AS5 and SS21 ink.

The "Eco Cartridge" is a reusable plastic case to be able to replace an internal ink pack. It aims to lighten the burden on the environment by reducing plastic waste.

The SS21 gained the certification of "GREEN GUARD Gold", based on most strict global standard of chemical substance diffusion. It assures the product property conforms to schools and medical facilities. This ink minimizes the emission of chemical substances in the indoor space and reduces the burden on the global environment.

I Mimaki's newly developed Eco-sol ink CS250

The CS250 boasts excellent safety and high quality,
which is evaluated by waveform created by a printer
manufacturer. One of the features is upgraded drying
property.It evaporates quickly after printing and print-outs dry
much faster, which prevents blocking and enables
reproducing in detail even images that need a lot of
ink.The CS250 is contained in one-liter bottle that allows
prolonged operation. it is a green product that abates
odor for a better operating environment.Mimaki

JV100-160

IMPRESORA CON DESEMPEÑO PROFESIONAL

1.60m

Hacemos fácil imprimir como un profesional

La JV100-160 es una impresora económica de tinta eco solvente de gran performance. Perfecto para la impresión de carteles, afiches, rotulación vehicular, reproducción de arte y mucho mas.

Disponible en 1.60m con velocidad de impresión hasta 70 m2/h

Eco-solvente: 4 colores

Dot Adjustment System (DAS) sistema automático de alineamiento para calidad y repetibilidad

Nozzle Check Unit (NCU) sistema automático de monitoreo de boquillas para garantizar calidad de impresión

Nozzle Recovery System (NRS), sustitución automática de boquillas obstruidas, evitando interrupción de trabajos y pérdida de calidad

Nuevo y fácil de usar RIP software RasterLink7, reduciendo el tiempo de ripeado hasta en un 25%

Cabezal	Dos escalonados, bajo demanda
Resolución de impresión	360 dpi, 540 dpi, 600 dpi, 720 dpi, 900 dpi, 1080 dpi, 1,200 dpi
Velocidad de impresión (4 colores)	Hasta 70 m2/h
Area máxima de impresión	63.3" (1610.0 mm)
Ancho máximo de material	63.8" (1620.0 mm)
Grosor de material	hasta 0.04" (1 mm)
Peso máximo de rollo de material	hasta 50 Kg
Tipo de tinta	eco-solvente: C, M, Y, K,
Empaque de la tinta	2000ml
Interface	1000 Base-T Ethernet cable o cable USB2.0
Fuente de poder	AC100~120V/ 200~240V±10%, 50/60Hz±1Hz
Condiciones de trabajo	Temperatura 20° – 30°C Humedad: 35 – 65 % RH (Sin condensación)
Dimensiones (A x L x H)	2.91m (115") 0.76m (30") 1.06m (42")
Peso empaque	219 kg (483lb)
